Professional Summary

BCA graduate with a software development foundation and hands-on project experience in web and mobile application development. Built projects using React, React Native, JavaScript, Expo, Supabase, Python, and machine learning tools. Interested in full-stack development, AI/ML, Generative AI, and practical software development, with a focus on building useful applications and continuously expanding technical skills.

Technical Skills

Frontend: HTML5, CSS3, JavaScript, React, React Native, Expo, Vite

Backend & Database: Node.js, Supabase, Firebase, REST APIs, SQL, Authentication, CRUD Operations

AI & Machine Learning: Python, Pandas, NumPy, Scikit-learn, Machine Learning, Generative AI, Prompt Engineering

Tools: Git, GitHub, VS Code, npm, Vercel, EAS, Postman

Projects

PetHub

React Native, Expo, Supabase, JavaScript

- Developed a pet-care and adoption platform for pet owners to access grooming services and adoption opportunities.
- Implemented grooming booking and pet adoption workflows with user authentication.
- Integrated Supabase for database management and developed an admin management panel.
- Final semester project; deployed web project: pethub.vercel.app

ForgeAI

React, JavaScript, AI, APIs

- Developed an AI-focused career technology concept for exploring career opportunities and supporting career-related decisions.
- Worked with React, JavaScript, AI technologies, and APIs to build the application interface.

AI Idea Validator

React, JavaScript, Generative AI, AI APIs

- Created an AI-focused web interface for evaluating and exploring product and startup ideas.
- Integrated Generative AI concepts and AI APIs into the application experience.
